

Leo Gong

Software developer

+358 408278956 | Leo.gong.dev@Gmail.com | [Oma Portfolio](#) | [Linkedin](#)

I am a passionate programmer skilled in Data Management, mobile application development, web development, and cloud service projects. I have a strong desire to deepen my knowledge in areas that interest me. I particularly enjoy collaborative problem-solving and working on projects with others. At the start of my career, I was able to develop my skills through various internships. I am highly motivated by learning opportunities, technology, and the challenges of software development. I am always eager to learn new things and expand my expertise.

Work Experience

SILLI

TRAINEE PROGRAM

June 2016 - July 2016

- Worked with experienced programmers to gain a better understanding of software development and improve my programming skills.
- Collaborated with the team to solve tasks and challenges, leveraging my problem-solving abilities.

Gofore Oyj

SOFTWARE DEVELOPER TRAINEE

Oct 2018 - Dec 2018

- Utilized cloud services.
- Handled small programming issues.
- Completed on-site training and developed new skills with the guidance of supervisors.

Extreme Consulting

SOFTWARE DEVELOPER TRAINEE

Apr 2019 - May 2019

- Participated in work-based learning, applying school-taught concepts and skills to practical problems and challenges.
- Collaborated with colleagues to identify and solve issues, effectively utilizing programming tools to find solutions.

Good2know

SOFTWARE DEVELOPER Intern

Jul 2025 - Sep 2025

- Led my own ai project independently from concept to delivery for end users.
- Gained exposure to the marketing side of product development.
- Took responsibility for making technical decisions and solving coding challenges.

Education and Certifications

Metropolia University of Applied Sciences

Tieto- ja viestintätekniikka

2022 –

- Information and Communication Technology
Specialization: Mobile Solutions
- **252 credits completed — all coursework and thesis finished; graduating June 2026**

CERTIFICATIONS:

[Amazon Web Service \(AWS\) cloud Architecting](#)

Skills and Interests

- Full-stack & mobile development: JavaScript, TypeScript, React, Node.js, Python; building web and mobile applications with REST API integration and PostgreSQL/SQL databases
- LLM-powered application development: built and shipped a production LLM application end-to-end at Good2Know; experience integrating Claude, ChatGPT, and OpenAI APIs into real products
- Prompt engineering & AI tooling: designing prompts for production workflows; hands-on with Claude Code, GitHub Copilot, and Cursor to accelerate development and automate documentation
- Cloud & engineering practices: AWS (certified), Git version control, clean code principles, software testing; comfortable picking up new languages, frameworks, and tools
- Collaboration & delivery: experience in agile, cross-functional teams; ownership of projects from concept to production; clear communication with teammates and stakeholders
- Interests: gaming, investing, and fitness; building side projects with new technologies and exploring the latest developments in AI

Language Skills

- Finnish: Native
- Chinese: Intermediate level
- English: Intermediate level
- Swedish: Basic conversational skills
